How to Use MasterCard TSE within TMat

- You will need the software ICCSimTMat MasterCard TSE 2.0 (contact) or ICCSimTMat Paypass TSE 2.0 (contactless).
- Your Acquirer will create a test list package using the 'MasterCard Test Selection Engine' software.
- Note that the test list package will contain both contact and contactless tests if applicable. They are not sent in separate files.

Test Selection Engine 3.0.0.109

The MasterCard TSE tool can create the test list as either a **.tse** file or a **.tsez** file. The **.tsez** file is required for import into TMat. Please ask your acquirer to send the test list in the .tsez format.

Import into TMat

The test list can then be imported into TMat as follows:

1. Create a new project and click 'Import Test List'.

🏪 ICCSimTMat: Test Man	nager - Acceptance Test: McardTIP MTIP v2.0

- 3. Save your project
- 4. Run the tests as normal

5. Export the test results and logs (in MasterCard format) back to the **ORIGINAL**.tsez file by selecting Tools – Export MasterCard Results.

Select Existing .tsez file
